### About This Game

Castle Demolition VR is a casual game that allows the player to unleash total destruction upon unsuspecting structures. With 15 challenging levels to play, the good times just keep on rolling!

There are 15 levels to play, and 4 different types of ammo to destroy the castles with. Each new level has its strengths and weaknesses that can change how you approach them.

A great twin-stick shooter. Slick graphics and music and a competitive scoring system. Also, the developer is very responsive to feedback and the game is often updated.. How do you make a game so far off and worst from the original? The original culling was actually pretty good, It was a small fast pace br that focused mostly on melee and crafting, it was rare to get a gun and even when you did ammo was incredibly scarce. Unfortunately the original Culling died since it came right before the BR craze and got crushed by games such as Fortnite and PubG. But the Culling two is so incredibly dissapointing and just an awful game. I don't get how the devs made this and said to themselves "yeah this looks ready for steam". Like sersiously. Everyting about it screams a really watered down H1Z1 wannabe, It completly lost all its charm from the first game. They would have done better at attempting to revive the first game instead of realeasing this non sense.. A really nice and simple game! :D. Looking forward to seeing this game develop further.. A short but interesting experience. Definatly worth it for the price.

Planning on replaying soon while tripping.. Best guide how to clomb out of silver. Dont and ranked up til global in just 3 minutes watching trailer. Thanks Valve!. must be fast hand!

A good game but i need some more work.. I'm going through my entire library and putting a minimum of an hour into each game and then reviewing them, here is mine for Black & White Bushido: A really great game mechanically with some really great ideas and concepts. Unfortunately it falls into the indie pitfall of being multiplayer based. While there is a couch co-op, my lack of friends makes that difficult to accomplish. So naturally I would lean towards online play but the servers are deader than Jacob Marely. This is one of those times I wish I could give the game a thumbs middle. Great if you have friends to play it with, not if you are stuck playing against bots the whole time. Oh also if you plan to buy it make sure you have a controller that works.. So what is the difference between pac-man and ms. pac-man really? Well she has a bow in her hair.... That's it? Get out of town!. I'm really amazed by the state of the game. Now i can say that it gives me RE and Silent Hill vibes! I like the environment and the enemies are pretty creepy tbh. Keep up the good job guys!. I don't recommend getting this dlc, b/c when I try to play said dlc the game menu brings up the store page.. very trippy and cool!  
took me a few minutes to figure out how to create some cool clouds and formations  
once you do, its a lot of fun

to the dev:  
adding music would be awesome  
and the FPS drops a lot in some situations  
different sized particles would be cool too
