Make sure to read about Photoshop's various file formats and how they can sometimes be interchanged, or at least converted, in a later chapter. The main steps in creating, manipulating, and editing your images are: Laying out and organizing the image Creating a new image Manipulating images Converting to the correct file format for your output device Comparing and viewing images Saving your image In this chapter, I explain how to handle the various stages in your image-creation process, including laying out the image, creating a new image, manipulating the image, converting your image to one of its different file formats, viewing and comparing your images, and saving your image. The rest of the book focuses on improving your editing skills, along with some useful applications that you can use for enhancing and altering your images. Laying Out and Organizing the Image In the beginning of your editing journey, the first step is to lay out the image. After you get acquainted with the basics of Photoshop, you can start experimenting with the different layers, tools, and commands you need to edit your images. But before you can begin to play around with an image, you have to make sure that the image is laid out in a logical, digital format. (More about digital formats later in this chapter.) If you're new to Photoshop, you may not understand layers well at first, or you may not have everything you need to get the best results in your images, such as a proper picture size, a good file format, and a proper color profile. See Chapter 5 for a discussion of layers and tools for editing and manipulating images in Photoshop. If you're new to Photoshop, you can use the steps I show you in this chapter to lay out your images for editing, including selecting the proper image size, deciding on a color space for your images, and most importantly, setting up a default point of view for the overall image. Photoshop's Layers panel enables you to view your images as separate layers. The layers enable you to easily move, rotate, resize, and crop, or stretch, your image. (I cover cropping and resizing in detail in Chapters 11 and 12, respectively.) Setting up an initial layout Use the following steps to lay out the initial shot you're going to edit: 1. Choose File⇒Place to open the Place dialog box.

A chronological and strategic history of One Nation at a Time from its inauguration in 1967 until the present, including its politics, strategies and practical implementation. Sunday, January 4, 2007 Coastal City News Our immediate focus has been an effort to force the Republican-led state Legislature and governor to return to the people's will when it comes to voting on a constitutional amendment that would create a 32,000-member powerful executive commission to advise the governor to veto bills that do not require a two-thirds majority. Vote: Throwing out the rule of two-thirds. The current rule was an established principle adopted by the framers of the constitution in that there be no veto. But the governor's office and many state legislators will argue that the governor has this power under the Wyoming Constitution Article V, and the veto already stands as precedent. But this veto is a major transition in the constitution. It would have to be resolved by popular vote in the next election, and even then the results are not certain. That's why we have asked several of the legislators, especially from Jackson Hole and other rural counties, to put pressure on their Republican colleagues to repeal this veto. Fortunately the Republicans are sensitive to public sentiment and support their governor. However, the hand-wringing among legislators over the veto has been done in private meetings. That's why we went public when we knew we had a chance to change the result. Meanwhile, we're pushing the agenda on the issue of Independent Redistricting Commission in February. A clear winner should be declared and the commission should be established by the fall of 2007. But we've missed our best opportunity to do this in the state Legislature. In the House of Representatives, a bill to establish an Independent Redistricting Commission passed easily. The majority of the members were not from Wyoming's districts but from the growing urban area of Denver-Julesburg. But this effort was blocked in the Senate and even some of the urban members of the House did not vote for the bill. In addition, several legislators have concerns over the way the committee would be established with the governor having veto power over the new panel. We are hopeful that one or more reform bills will make it to the governor's desk during the next legislative session. One bill would establish a commission to do redistricting based on data. Another would cut back an
